To Whom It May Concern,

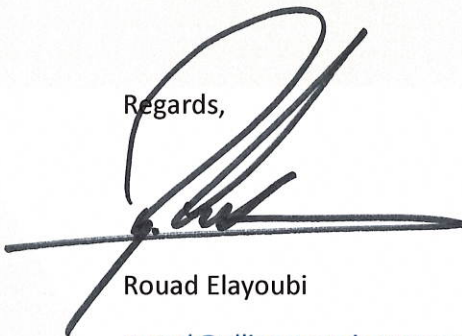

Testimonial

ALJ has provided structural engineering services on two of our projects. On both occasions they have provided innovative solutions and worked closely with all stakeholders to achieve high level outcomes.

Our experience with ALJ has provided multiple opportunities for them to demonstrate their high level of technical expertise on complex projects and their attention to detail. We have no hesitation in recommending the services of ALJ as listed below:

1. Expert Witness and Engineering litigation services
2. Structural Diagnostics
3. Peer review
4. Structural Quality Control
5. Complex Structural Engineering Design including PT and shoring

Regards,

Rouad Elayoubi
